

AMENDMENTS TO THE SPECIFICATION:

At page 4, the second full paragraph, lines 6-10, please amend as follows:

The central part of the configuration is a base station 2, which is coupled via an interface 3 ~~with a~~ with at least one base station-router 4. The base station 2, also called Central Distribution Node, is a central data-processing and computer unit to control a variety of incoming and outgoing connections. A unit of the MSV5 type can be used as base station 2.
